M. D. of Cereal

The council of the Municipal District of Cereal No. 242 met in the municipal office at Oyen, Alberta on Saturday November 10, at 1 o'clock a.m.

All the councillors were present. The minutes of the council meeting of October 13th were approved as read.

The financial statements were adopted as read.

The council decided to make a grant to the Salvation Army for the year 1928.

The council refused the offer of A. Wade for the purchase of the N.W. 20-28-1-4 on a lease agreement.

The council accepted the offer of F. Pope to pay \$100.00 taxes on the N.W. 1 26 4, in lieu of the seizure.

Taxes as follows were cancelled from the N.W. 1 26 4, Municipal taxes \$48.00, Supplementary Revenue taxes \$58.97.

The council recommended that the mothers allowance of Mrs. A. Peterson be reduced from \$10.00 per month to \$35.00 per month.

The council approved the action of the Secretary in withholding from Tax Sale S.W. 16-27-1-4.

Taxes as follows were cancelled from the N.E. 11-28-5-4, Municipal taxes \$21.16, Supplementary Revenue taxes \$2 cents.

The Reeve and Secretary were authorized to issue a cheque to the Department of Interior for \$224.00 for legal subdivision 13 of N.W. 11 28 4-4, for gravel for roads.

The correspondence was referred to the council and dealt with.

The Reeve and Secretary were authorized to pay the taxes on the land acquired under the Tax Recovery Act 1922.

By-law No. 57 was given a first and second reading. This was a by-law making a grant of Fifty dollars to the Salvation Army for 1928.

The wild lands tax assessed against S.W. 3-27-6-4, was exempted for 1927 and 1928.

The council agreed to sell the N.W. 3-27-6-4, to A. V. E. Chalkline for the sum of \$100.00 subject to the encumbrance against it.

The following road work accounts were passed: W. J. Byler 23.00; J. Barker 22.50; G. M. Snell 16.70; Sam Davies 9.90; G. Fowler 10.20; R. Green 8.10; W. Wright 8.10; V. Seymour 4.50; J. Marsden 21.00; D. McQuarrie 17.00; A. V. E. Chalkline 30.82; E. L. Ketcheson 107.10; Peter Borsholm 10.80; M. H. Tugger 28.80; J. W. Rutherford 28.80; J. H. Ketcheson 13.05; A. Sutherland 70.95; N. Leitch 7.20; J. H. Werry 4.05; R. Barker 108.05; P. Fair 36.00; Miles Oliphant 57.60; W. Peterson 114.50; Oscar Olson 30.10; W. Duffield 39.25; J. Williams 22.25; R. Nisbet 40.50; R. W. Nichol 18.00; P. McBeon 36.00; E. Woods 9.00; C. Nichol 6.50; G. D. Osborne 9.75; H. Duffield 12.50; F. Sauve 36.00; H. L. Larvick 125.85; J. Larvick 75.00.

The following accounts for road supervision were passed: F. W. Nichol 76.00; A. H. Gibson 70.00; J. Gripp 68.00; C. O. Olson 62.00; J. E. Werry 78.00; G. H. Mehl 68.00.

The following Council meetings and mileage accounts were passed: A. H. Gibson 15.00; J. Gripp 16.80; C. O. Olson 22.80; J. E. Werry 22.80; F. W. Nichol 18.00; G. H. Mehl 15.00.

(Continued on page 8.)

Christmas Trees

About seven millions trees will be used in North America this Christmas. The question immediately arises—Are we devastating our forest by brightening up the homes and making millions of youngsters happy at Christmas time?

Prominent authorities such as Dr. C. D. Howe, Dean, Faculty of Forestry, University of Toronto, in Canada and Wm. G. Howard, superintendent of State Forests, New York State, in United States say "No". Dean Howe says "an area of thirty square miles if set aside for this size can be grown in the nursery inside of ten years and in the forest in fifteen years."

The average size of the Christmas tree marketed in the States is six feet. A spruce tree of this size can be grown in the nursery inside of ten years and in the forest in fifteen years.

Mr. Howard says—"Trees are for use, and there is no other tree to which they could be put that would contribute so much joy to mankind as their use by children on this great holiday."

He further states "in our state, a large proportion of Christmas trees are cut from pasture lands, where they are a nuisance, or from other lands which the owner desires to clear for farm purposes, so that the trees would be cut in any event and the marketing of such for Christmas gives the owner some return for his labor."

Every editor an expert. The departments of the Family Herald and Weekly Star, Montreal, are all headed by men of practical experience and nation wide fame—that's why it's first in public esteem. The subscription price is only \$1 a year or three years for \$2.

Canada On Easy Street

Hon. James A. Robb, Dominion Minister of Finance, is credited with the term comment, "Canada is on easy street," when making announcement last month that even before due date, the Treasury had paid off \$25,000,000 of the \$30,000,000 short term bonds falling due on October 13, last, and that the balance would be paid on due date out of cash on hand in the Treasury. Even so, said Mr. Robb, there would be "some left over," and he had reason to hope, "if Providence continues kind to us and gives us good crops, and business keeps just as good as it is now, without even getting any better," to take care of further maturing bonds coming along soon without having to resort to the issue of revolving loans, Canada was able to pay off \$25,000,000 of its public debt this year. And this does not represent the full amount of the debt reduction that has been effected; this year, with a consequent lowering of the interest burden.

In the short period of six years, the public debt has been reduced to an extent that means a lessening of the burden of interest, annually in an amount of almost \$10,000,000. And if Mr. Robb's expectations for the next five years are realized an equally large, or even larger, amount will be topped off by 1932.

The most gratifying feature, however, is that the substantial reduction in debt and in annual interest charges has been achieved, not as a result of increased taxation, but concurrent with a general decrease in taxation, including lowering of tariff schedules, a lighter tax on business profits, reductions in the sales tax, smaller income taxes, reduced postage rates, smaller stamp levies on checks, and the abolition of stamp duties on receipts. In a word, the removal of restrictions on the business of the country has been helpful in the development of business, and, as a direct consequence, larger revenues to the Government.

Another important factor has been the really phenomenal improvement in the management and finances of the Canadian National Railways, as a result of which the Dominion Treasury is no longer called upon to pay out huge sums to cover operating deficits and in interest to the public on account of railway bonds and debentures. On the contrary, the C.N.R. now accumulates an ever increasing surplus to apply on its past obligations to the Government.

The year now drawing to a close will, it is confidently expected, disclose a record year in the history of the Canadian National Railways, while President Doolittle is authorized for the statement that 1929 will, in all probability, prove to be the banner year in the history of the Canadian Pacific.

A perusal of the press of Canada, and particularly of all financial journals in which are recorded the annual reports of the banks, trust, loan, mortgage and insurance companies, and all the large manufacturing and industrial concerns of the Dominion, discloses the fact that one and all are enjoying great prosperity, enormously increased business and substantial profits.

No one circumstance can be credited with the whole responsibility for this magnificent showing, although it is safe to say that the great grain production of the West coupled with the betterment in the life farmers are reaping the increase in dairymen and other branches of agricultural expansion, form the background, and is largely responsible for the general speeding up in the whole business of the country, and is occasioning the transfer of other lines of industry from the East to various centres in the West.

The general betterment is the result, as Mr. Robb frankly recognizes, of a beneficent Providence without whose aid all man's efforts must come to naught. It is due, also, to the courage, industry and enterprise of the Canadian people, and to some extent to the steady improvement in world economic conditions, inasmuch as Canada is dependent so largely upon its export trade.

Present conditions are, therefore, good and sound, and future prospects are very bright. It remains for the people of Canada to take full advantage of the situation, not to rest on their oars, but to plan and work in order that our rosy expectations for the coming years may be fully realized. Every reduction in the public debt, every dollar saved in interest charges, every item of taxation lowered or wiped out, means further relief to all people and a further incentive to still larger development and growth. It is, therefore, to everybody's advantage and gain to work together in national co-operation.

West Coast Fisheries

The pilchard reduction industry on the west coast of Vancouver Island records an advance of 50 per cent. in production this year as compared with last, with an output of 16,000 tons of meal, and \$200,000 gallons of oil. Within the past three years the number of plants have increased from five to 22.

Women of Scotland are wearing hats trimmed with flowers made from beech nuts.

Harvesters Find Employment

The picking of British harvesters in winter employment is making good progress in Southern Alberta. Secretaries of the C.P.R.'s colonization bureau report that farmers are responding very well and that a number of deals, satisfactory to both farmer and helper, have been arranged.

The Bookman—Are you the man who cut off his hair last week?

The Barber—I don't think so, sir. I've only been here six months.

A Delicate Operation

Eye Is Successfully Grafted On Person Who Regains Sight
One of the most delicate operations known to medical science played at least partially successful when Dr. Ferguson, of New York City, grafted blind, looked dimly at the light through another man's eye.

Ferguson's eye failed him several weeks ago and doctors, in an effort to restore his sight, decided to transplant the cornea from another eye.

Charles Greenblatt, whose eye was removed because of a tumor, offered it to the surgeons and the cornea, still alive, was removed and grafted to Ferguson's member.

The medical world awaited the result anxiously and there was great interest today when the bandages were removed.

Ferguson was able to distinguish objects ten feet away. Surgeons said the development of sight and the permanent nature of the operation would depend upon the ability of Ferguson's optic tissue to nourish the cells of the grafted cornea.

WHEN YOUNG GIRLS GROW PALE AND THIN

Dr. Williams' Pink Pills Should Be Taken To Enrich The Blood

When girls grow weak, pale and thin, parents must not neglect these symptoms; do so means danger to the health of the child. It is not robust womanhood without an abundant supply of rich, pure blood, and her veins. It is the lack of this that is the great trouble with fine girls who grow pale and thin. Dr. Williams' Pink Pills have achieved world-wide fame for their ability to enrich the blood and build up the system. In these pills there is a vigorous tonic which builds up the system, giving energy for every weak, pale girl. The value of the pills in cases of anemia is proven by the fact that the girls of Mrs. Winnifred Rusty, Barre, Vt., who were so weak and thin, got about two years ago my oldest girl into very bad health. It was the best of her health, and having her tonsils removed, saying she was the best of her health. We had then removed, but it did not help her, and she was so weak and thin, she did not pick up at all. She could neither eat nor sleep, and what she did take did not digest. Then she developed a cough, kept her awake at night, and went down to weight to 90 pounds. A neighbor said to me, "You have tried so many things you may not try Dr. Williams' Pink Pills." I tried some and before I had finished the second box she began to eat and sleep, and in a short time she was the use of the pills for some time and is now in the pink of condition, able to work and play, and eat and sleep with all her old-time vigor. These are the results of the pills. I am a mother who watched her restored to health to perfect health.

If your mother is weak, does not keep these pills you can get them by mail or from your nearest Dr. Williams' Medicine Co., Brockville, Ont.

Tourists Like Victoria

Tourists to the capital of British Columbia this season numbered 87,000 persons, according to the Victoria Tourist Bureau. Tourist travel from Canadian points and from the west coast of the United States to Vancouver Island and Victoria, where the C.P.R. and the coastal steamship service, shows an increase over last year.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgment there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Greater Vancouver

The population of Greater Vancouver has increased by more than 100,000 persons, or approximately 46 per cent. in the last four years, according to statistics contained in the local directory. The population is given at 344,160 against 317,185 in 1927, and 250,000 in 1924.

Break Colds With Minard's Liniment

Servant: Mrs. Green is out. Visitor: Good. When I entered the yard and saw Mrs. Green looking out of the window I was afraid she'd be in.

Cheapest Of All Oils—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada, from coast to coast, and every country merchant keeps it for sale. No, it is not easily procurable and is not moderate in price, no one should be without a bottle of it.

College boys are believed to be strictly favor the air mail, having found out this year that it enables them to get money from home just twenty-four hours quicker.

Minard's Liniment Heals Cuts and Bruises.

British Market Is Large

Canada Might Send Greater Supplies Of Farm Products

The Farmers' Sun says: "Great Britain imported dressed poultry to the value of £1,204,702 during January to August, 1928. Towards that amount Canada contributed poultry to the value of £11,978. During the same period Great Britain imported eggs (in shell) to the value of £1,099,385. Canada supplied £21,923 worth. Canada's contribution in such instance is infinitesimal and could be greatly extended. As regards butter the comparison is even more striking, as for the period January to August, 1928, the total imports were valued at £37,411,498, towards which Canada sent but valued at £13,639. Agricultural products in large quantities is being supplied to Great Britain by foreign countries, including the United States of America, which shipped dead poultry to the value of \$911,929 during the eight months mentioned.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 124-12th Ave., Calgary, Alta., bothered to much with my heart I could not sleep. I would awaken up in the night, screaming, and my heart would start pumping and pounding.

A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes.

Send a 50c box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Edmonton Land Office Busy

85 Homesteads Taken Out In One Week In October

During the week of October 9th to 15th inclusive, 85 homesteads were taken out at the Edmonton Land Office. This compares very favorably with the records throughout the year, and is a very much in excess of the number listed upon during the same period of 1927, when 16 homesteads and one quarter grant were taken out.

Minard's Liniment Invaluable Everywhere

"My mother will be surprised when she gets my letter." August, she used to say "you are so stupid that you will never get a job" and in the last month I have had six."

The bride is given in marriage; sometimes the groom is sold.

Her Secret Beautifier

Envy Of Her Friends

Miss C. Delano, Washington, writes: "About two years ago, my complexion was a great deal with a muddy, sallow and simply, I could not get any more. I began with cosmetics, but this was not the way to get any more. I was recommended your purely vegetable laxative, and suggested my trouble was gone. I had never before had such a short while I noticed a wonderful difference. My complexion has improved, so much so that I have never had any more. My complexion has improved, so much so that I have never had any more."

Carter's Little Liver Pills

Sold at all druggists 25c and 75c per page.

Will Spend Winter In North

Major Burwash To Carry On Investigations In Arctic Regions

In the bleak and frozen reaches of Canada's Arctic regions an intrepid and experienced explorer of the department of interior will labor during the long winter months, collecting valuable data and otherwise add to the knowledge of conditions among the wards of the Dominion, the Eskimo. The investigator is Major L. T. Burwash, of the Northwest Territories and Yukon branch who early in June of this year left Ottawa on his distant mission.

Following a long trip to Akavik in the delta of the Mackenzie River the explorer conducted a preliminary survey of that country before proceeding into the Arctic proper.

According to wireless reports received from a government station in the North, Major Burwash now has established his winter base on Boothia peninsula, from where he will carry the investigations among King William Island, and on the mainland.

A survey of a proposed tractor route between Cockburn and Wager Bay will also be made. This project is being investigated with a view to ascertaining the possibilities of bringing in supplies for posts on the Arctic coast by way of the Hudson Bay and overland by tractor, rather than by the present long and hazardous route through the Behring Sea and the Northern coast of Alaska.

In May, 1929, Major Burwash will set out on theeward on the auxiliary schooner Plangman to investigate navigation conditions in the Franklin Strait and Peel Sound. He plans to join the annual Canadian Arctic expedition in the summer of 1929 with which he will return to civilization.

Chicken Hatcheries For Alberta

Company plans To Establish Hatcheries At Several Points In The Province

A chicken hatchery on a large scale is to be established in Alberta, according to M. C. Giesse, a member of the firm of Canadian Hatcheries, Limited, of Vancouver, and a recent visitor to Edmonton. He stated that the plan of the company was to establish, eventually, hatcheries at several points in the province, where there is unlimited scope for raising chicks of high quality strain; also for eggs and poultry.

No matter how deep-rooted the corn may be, it must yield to Holt's corn remover if used as directed.

A watch owned by Edward Fernlund, Gary, Ind., is 803 years old and weighs half a pound.

Minard's Liniment For Backache

The biggest expense in operating a car is the starting and stopping.

What is more satisfying after the bridge game than a cup or two of Red Rose Tea? Millions of Canadians prefer it to any other because of finer flavor, remarkable strength and dustless purity. Put up in aluminum—so the material will not completely protect good tea.

DIGIBLE BEST POSSIBILITY FOR OCEAN FLIGHTS

Ottawa, Ont.—On the success of the projected flight of the dirigible R-100 from England to Canada this spring will largely depend the future of inter-empire air communication, Air Marshal Sir J. G. Macpherson, K.C.B., said in an interview here.

The distinguished British air official spent the day in Ottawa on his way home from Australia and called upon Hon. J. L. Ralston, minister of national defence.

"The dirigible appears to offer the best possibility for ocean flights at present," he said. "The future will probably see multi-motored aeroplanes, capable of making such flights with safety, but for the next ten years the lighter-than-air machine seems best."

Australia was anxiously awaiting the result of the projected flight to Canada, he continued. A flight would have been made from England to the Antipodes via Egypt.

Proposed Wool Pool

Alberta Wool Growers May Organize Co-operative Marketing Plan

Edmonton—Wool growers of Alberta who are proposing to organize a co-operative marketing pool on lines similar to those of the Great Pool, moved one step nearer that end at a conference with Premier Bowden at which advice was sought and given on the question of procedure.

The meeting, which was a continuation of one held some time ago, was attended by representatives of 15 co-operative selling organizations among the wool growers in different parts of the province.

If and when a wool pool is formed, it will be on a contract basis, like that of the Great Pool, instead of the voluntary basis on which the Alberta growers are now marketing through the Canadian Co-operative Wool Growers' Association.

Details of the proposed new plan were discussed, including especially the contract terms and Mr. Bowden addressed the wool men as to how an effective organization might be built up. "It is likely that definite action will be taken in the near future."

New Air Company Formed

Chapter Has Been Granted To Trans-Canada Airways Limited.

Winnipeg, Man.—Another company, the Trans-Canada Commercial Aviation Ltd., has entered the commercial aviation field. Granting of a provincial charter to it was announced at the legislative building.

The provisional directors include R. Myers, barrister; J. R. Adams, agent and C. M. Hamilton, C. Berg, barristers. Headquarters will be in Winnipeg and the provincial capitalization is \$250,000.

Victim Of Invention

East Orange, N. J.—Doctor Sahin Von Schockdy died here, a victim of the luminous paint which he invented for the painting of watch dials in the plant of a radium corporation formerly located in Orange. Deaths of a half-dozen women, who were employed in the plant to paint watch-dials, have been attributed to the assimilation of radio-active substances.

Hudson's Strait Expedition

Quebec.—The Hudson's Strait expedition which started from Halifax, in July 1927, with the object of establishing data on ice, wind and weather conditions in the Strait the first year, has concluded with the return a few days ago of the C.S. Montcalm, in command of Captain John Hearn to Quebec.

Radio Phones For Planes

Chicago.—Radio telephone for aeroplanes to keep in touch with airports during flight is being installed on the New York-Chicago aerial route it was announced here. Engineers have succeeded in perfecting plane-to-ground and ground-to-plane radio telephony, it was said, enabling pilots to keep in communication with their bases while in flight.

Death Of Russian Admiral

Helsingfors, Finland.—Admiral Oscar Siarok, who commanded the Russian navy in the defense of Port Arthur against the Japanese attack in 1904, is dead. He was 82 years old.

W. N. U. 1749

Prospect For Further Reduction In Taxes

Income Tax Reductions Make Cut Next Year Probable

Ottawa.—Prospects for further substantial tax reductions next year are said to be improving with the increasing receipt of revenue collected by the customs department. In September the customs receipts showed an increase of over two million dollars over September, 1927. In October the customs receipts are said to be up by over three and half millions.

The seven million collections from customs are up by over seven million and a quarter millions dollars. A percentage of the increase is due to the larger percentage of collections of money due and a curbing of customs dodging.

The October excise collections when published show an increase of three-quarters of a million over October, 1927.

The excise taxes are down about fifty thousand but this is credited to the substantial reductions in the tax itself which this year amounted to 25 per cent. The net increase for the three months, however, is nearly three and three-quarters millions.

All government departments are said to have been instructed to prepare their estimates accordingly, and this is now being done so that with an increase in the revenue even under the expenditure further tax reduction will be included in the 1929 budget."

New Zealand Elections

Government Forces Under Premier Coates Receive Setback

Wellington, N.Z.—Prohibition was defeated by a majority of around 10,000 votes in the government forces under J. G. Coates, prime minister, suffered a severe setback in the election.

Prohibition was on the ballot in the form of a referendum as to whether a licensing system should be adopted. The overwhelming victory against prohibition continued the prohibition.

The new united party under the leadership of Sir Joseph Ward made a debut by gaining seats from the Premier's party all over the Dominion.

The final standing by parties was: Government, 28; United party, 26; Labor, 20; Independents, 4. The United party and Labor are opposed to the government. The Premier's party failed to gain a single seat. It held 53 of the 80 seats in the last parliament.

The new united party combines Liberal and Conservative elements opposed to the reform and Labor parties.

Three ministers lost their seats—A. A. Hall, minister of lands; G. J. Hawken, minister of agriculture, and J. P. Ralston, minister of justice.

Grain Inquiry Commission

Royal Commission In Saskatchewan To Probe Methods Of Grain Marketing

Regina.—Details announcement of the appointment and powers of the Royal Grain Inquiry Commission directed by the Saskatchewan Government to investigate the present methods and system of grading, mixing, handling and marketing of grain was made by Hon. C. M. Hamilton, minister of agriculture.

The commission consists of Chief Justice J. T. Brown, of the Court of King's Bench, of Saskatchewan, who is named as chairman, John A. Stongman, Saskatoon, president of the United Farmers of Canada, Saskatchewan section, and Dean W. J. Rutherford, head of the College of Agriculture at the University of Saskatchewan.

Public sittings of the Royal Grain Inquiry Commission will open at country points in Saskatchewan during the first week in December and will be continued as long as is necessary to enable farmers to present their cases.

Farmer Kills Large Wolf

Montreal—A wolf weighing 100 pounds and measuring six feet from nose to tail was caught in a trap and killed by a farmer at St. Scholastique, about 30 miles from Montreal. The animal was responsible for the deaths of 30 sheep.

New C.N.R. Hotel

Vancouver.—The civil building commission has given authority for the issuing of a permit for the construction of the 12-story Canadian National Railway hotel to be erected here at a cost of approximately \$5,000,000.

Lava Flow Diminishing

Natives In Mount Etna Region Meeting Changed Conditions

Giarre, Sicily.—With the lava flow from Mount Etna diminishing hourly in intensity, natives of the stricken region are gradually reorganizing their economic life to meet the conditions that nature has forced upon them.

There was some talk of tunnelling through the lava which has spread over the road as soon as the molten stream cooled and its flow subsided. This would restore the severed railway to normal service. One of the lava flows was Leonardo Patane, whose age is 100, and who is known as the "Granda of Nuntia." This intrepid centenarian steadfastly refused to budge from the threatened village. He proclaimed to all and sundry that he would be the last to leave. Now he is exhibiting a bold and fearless grin, saying "I told you so" in Sicilian dialect to all visitors.

Wheat Crop Estimated At Half A Billion

Figures Given For Canada's Production This Year

Ottawa.—Canada's wheat crop for 1928 is placed at 500,013,000 bushels in the crop report issued by the Dominion Bureau of Statistics. Last year's total was 492,024,700 bushels. The crop of fall wheat this year is given as 18,960,000 bushels as compared with 22,220,000 bushels last year. Spring wheat total for 1928 is 481,547,000 bushels as against 477,588,000 bushels the year before.

PLACE FOR THIS DOMINION IN EMPIRE AFFAIRS

Montreal.—A willingness to share responsibilities which in the earlier stages of Imperial development Britain bore alone is the obligation which Canada and other Dominions should be ready to meet for their development in the British Commonwealth of Nations.

The Canadian ambassador, secretary of foreign affairs in the British government, met with the people of Canada before he left Montreal for Quebec on route to England.

"There is room in our Commonwealth," said Sir Austen, "for the fullest development of Canadian nationality."

"We welcome your co-operation in all fields, and not least in the field of foreign affairs, but now that you claim, and rightly claim, a place in the field of foreign affairs, you must study them. You must take an interest which will make your papers afford you all the information necessary to enable you to form a judgment and you must be willing to share the responsibilities which in the earlier stages of Imperial development we have had to bear alone."

"We shall welcome your assistance and even your criticism. But let it not be criticism after the event, but a real partnership in forming the decisions."

WINNERS OF FIG CLUB COMPETITIONS

Lawrence Wilkinson and Stewart Bruce, Tuxford, Sask., winners of the Pig Club Competition on Canadian Pacific Railway lines in that Province, will be guests of the company at the Royal Winter Show, Toronto.

PREMIER OF NEWFOUNDLAND

May Move Weather Bureau Headquarters Of Department Likely To Be At Ottawa

Ottawa.—With the retirement of Sir Frederick Stuart, director of the meteorological service of Canada, on January 1 next, it is expected that the headquarters of his department will be removed from Toronto to Ottawa.

The growing service of the bureau to navigation, forest fire fighting, the work done by the Department of Marine and Fisheries and, more recently, the aeroplanes traffic together with the fact that all the important branches of the weather service are located here, are given as the reason for the change.

TRAGIC STORY OF SINKING OF LINER VESTRIS

New York.—Two shipwreck survivors of the Lamport and Holt liner Vestriss, which was wrecked in the Gulf of St. Lawrence, are being interviewed by the press.

Search For Small Continents

May Use Steam Shovel To Dig For Remains of Missing Millionaire

Toronto, Ont.—Patrick Sullivan, special agent for the Misses Small, sisters of Ambrose J. Small, missing since 1914, may secure, it is said, a steam shovel outfit from Bolton, Ont. to excavate the Rosedale dump where both Sullivan and Dr. Langner, criminologist, believe the remains can be found.

Sullivan anticipates that the work of excavating the dump will cost in the neighborhood of \$5,000.

Despite previous assurances that he had abandoned his enquiry into the disappearance of Small, Langner will return to Toronto from Montreal for further work upon the world-famous mystery, it is learned here.

"I have been in touch with Langner and he tells me that he will be back here at work on the case before the middle of next week, perhaps before," Sullivan said.

Cyclone Does Heavy Damage In Argentina

Many Killed and Over Million Property Loss Estimated

Buenos Aires, Argentina.—Heavy loss of life and damage are reported from the region of Villa Maria, railway centre, which was struck by a cyclone. Eighteen persons are known to be dead in Villa Maria, with the number of dead and injured in neighboring towns unestimated.

Villa Maria was partly destroyed while nine other nearby towns had suffered much damage.

Property loss was estimated at \$1,500,000.

Increase In Wheat Crop

Sydney, Australia.—The government statistical department announced today the estimate for the Australian wheat crop of 1928 was 154,000,000 bushels, an increase of 60,000,000 bushels in two years.

Expect Large Sales

Regina.—About 100 carloads of dressed poultry are expected to be sent in various parts of Canada and the United States by the central selling agency of the Saskatchewan and Manitoba poultry pools.

SUPERB COURAGE OF RADIO MAN BEYOND PRAISE

New York, N.Y.—The work of Noel O'Loughlin, radio operator of the ill-fated steamer Vestriss, places him among the heroes of the sea in the disaster, in the opinion of veterans seamen and radio men.

O'Loughlin, a young Irishman, under 30, and little known here, was according to survivors of the tragedy off the Carolina coast, one of the last to jump from the liner but he undoubtedly was lost.

Lieut. Albert C. Rogers, communication officer of the naval operating base at Old Point Comfort, has this to say of the Vestriss operator.

"His courage and his coolness in my mind were superb and beyond any precedent. His behavior was courageous than he was doubtless more than the unfortunate number who would have been rescued. It is for all of us to revere his memory. I know the navy salutes him."

Chief Radio Man D. N. Harris, of the naval radio station at Hampton Roads, a veteran of 16 years, said this:

"Only a man who has been in trouble at sea can understand just what O'Loughlin accomplished. There was a radio operator anywhere who did not realize long before the Vestriss went down, just what a magnificent feat this fellow was making. He worked under the worst conditions and came pretty close to accomplishing the miraculous."

"God, how cool and level-headed he was with everything against him. I don't know of anything like him in my experience."

Time elements vary in the stations here as to when O'Loughlin first sent out the SOS signal and when he closed up, but a fairly accurate estimate is that he started a few minutes after 10 o'clock Monday morning and stuck to his post until the ship was lost.

Two hours and 15 minutes after your into the radio room, about 12:15 that afternoon. At no time, say the local operators, was the Vestriss man excited or frantic. An indication of this was given in the last message he sent which recorded the navy, at the naval operating base. Some reports had him making a somewhat heroic last effort to save the Vestriss. The last message he sent was: "Abandoning ship, V. A." Two hours and 15 minutes after your into the radio room, about 12:15 that afternoon. At no time, say the local operators, was the Vestriss man excited or frantic. An indication of this was given in the last message he sent which recorded the navy, at the naval operating base. Some reports had him making a somewhat heroic last effort to save the Vestriss. The last message he sent was: "Abandoning ship, V. A."

The name of O'Loughlin will be inscribed on the monument in Battery Park, erected to the memory of wireless men, as one who kept the unwritten law of the sea by staying to his ship until the end. He will be the fifteenth name on roll of honor. One of the which two of the radio operator of the Titanic.

United Grain Growers

Next Annual Meeting Will Be Held In Regina

Calgary.—Next year's annual meeting of the United Grain Growers Ltd., will be held in Regina, it was decided at the closing session of the 1928 annual meeting. The vote to hold the meeting in Regina was practically unanimous.

Two delegates from Regina, Murdoch Cameron, and J. L. Williamson, presenting a request from the Regina shareholders that the next annual gathering should be held there. This request was supported by a telegram from the Regina shareholders, the Regina and the board of trade of that city.

Next year will be the first occasion upon which the annual meeting of the U.G.G. has been held anywhere else but Winnipeg or Calgary, because of the which two of the radio operator of the Titanic.

Cordial votes of thanks to the directors and employees of the company were passed. Expressions of satisfaction were also adopted with regard to the successful results of the past year's business and the financial condition of the company.

Cathwood Station

Winnipeg.—"Cathwood" will be the name of one of the new stations on the recently constructed Rosewood-Perdue branch of the Canadian Pacific Railway. The station is named after Miss Cathwood, of Saskatoon, who brought fame to Canada by her accomplishment at the Olympic games held in Amsterdam this year.

Judge Felix Hebert, French-Canadian, will be first of his race to sit in Judge's seat. He is Rhode Island's choice.

Has Faith in Canada's Future

Albert Hildesheim, the American con-
sul-general, was the guest of honor
at a recent "Pilgrims' luncheon" held
in London. Mr. Hildesheim was wel-
comed by a hundred men prominent
in British life who extended greetings
to him on behalf of the Pilgrims So-
ciety, speaking of the relationship of
Canada and the United States. Mr.
Hildesheim said:

"After many years in Canada I
feel justified in saying that Canada
is, as has been so well said, inter-
preter of the United States to the
United States and to the United States
to the United States. I am in an
exceptional position to interpret
Canada to you. It is very gratifying
to refer to the continuing growth of
the Dominion. I feel that the natural
development of the Dominion into a
first-class nation is a reality. If any-
thing increased, its devotion to the
British crown and its sympathy and
interest and pride in Britain and the
Empire."

"After the close of the Great War,
until Canada's contribution was
known, but which left a heavy in-
debtedness and the necessity of re-
payment, Canadians met their prob-
lems with courage and optimism. For
several years their situation has
been improving until now the govern-
ment is paying off its debt from in-
creased prosperity, optimism is
general, and though there was a wave
of speculation which seemed threat-
ening, that danger seems past and a
look forward with assurance to a
continuing development and growth
of the Dominion, whose resources are
unexplored and whose people, both
British and French, as well as those
of other strains, are filled with cour-
age and actuated by high sentiments
of duty and honor."

"There is a continuing develop-
ment of friendship between the United
States and Canada and of mutual
respect, confidence and regard. Both
countries feel that our relations, one
with the other, and the absence of
any frictions, are a model for the world,
standing as an example to the world."

Lord Desborough, president, read a
message from Premier Mackenzie
King of Canada.

How Safe Is Civilization

More People Killed By Automobile
Than America Than Wild Beasts
Kill In India

The land of India, as we all know,
is sadly benighted and uncivilized.
Last year, for instance, 24,000 people
there were killed by wild beasts and
reptiles. Snakes alone took 10,000
lives; tigers took 1,033 more; wolves,
468; leopards, 217; and crocodiles 140.
Deplorable isn't it?

Fortunately we in the United States
don't face those dangers. We are far
too advanced and civilized for any-
thing like that.

To be sure, there were more than
24,000 people killed in the United
States last year by automobiles. But
in the words of the immortal Mr.
Mark, "What's the idea in bringing
that up?"

Not Really Hurt

A young negro, driving a cart
drawn by a mule, was endeavoring
to induce the animal to increase its
speed. Suddenly the mule let up
with his heels and the negro a
treasonous kick in the head that
stretched him on the ground.

"Is he hurt?" asked a stranger of
another negro who had jumped from
the cart and was standing over the
prostrate driver.

"No, he's not," was the reply. "That
mule will probably walk him out of
dah for a day or two, but he ain't
hurt!"

It's another of life's little contra-
dictions that a man can marry a
widow and marry again at the same
time.

STORIES AT THE POLE

"One and one with us. No cere-
mony. Just the usual black jacket."

—Journal American, Paris.

W. N. U. 1760

England Has One Woman Blacksmith

Has Been In Business For Over
Twenty-Five Years

Mrs. Annie Chubb, of Kentish Town-
road, in North London, Eng., is be-
lieved to be the only working woman
blacksmith in England. She has been
in the business for more than twenty-
five years.

She makes iron balconies and win-
dow frames and artistic "nailed"
ironwork. She can swing a fourteen-
pound sledgehammer as well as any
man.

Mrs. Chubb is sixty-three years of
age, and has trained her three sons
to follow her trade—one in America
and two in England.

"I have been a widow for many
years," said Mrs. Chubb. "My hus-
band was a blacksmith, and I took up
the work to help him, as he was deli-
cate and could not manage single-
handed. After he died I carried on
the business."

"When first we had the forge
the mountain current bushes
grew around it, and I had to cut a
patch of grass and some trees at the
back."

"The heaviest job I ever did was
to make two giant hoops for a factory
churn. They were so heavy that
they had to be made in two
pieces."

"My favorite work has always been
the more artistic forms of iron bat-
ting."

"We used to make those antique
"dogs" for fireplaces that interest
collectors. They had to look old and
beaten, and were destined to be-
come "links."

Mrs. Chubb's only assistant is her
twenty-two-year-old son.

Animals Found Of Music

Quiet Pieces Played On Piano Give
Them Pleasure

A well known musician has been
making inquiries as to the likes and
dislikes of animals with regard to
music. It is generally thought that
dogs dislike it, but these inquiries
show that it is only the rougher kind
which they dislike, while the best
classical and modern music seems to
give them pleasure.

The piano seems to be their favor-
ite instrument, and the violin and
trumpet sound their pet aversions. Many
cats are attracted by the piano when
quiet music is played, as well as when
they themselves can make music by
running over the keys. Caged birds
are cured of home sickness by its
means, and monkeys can make music
from a distance to listen to it.

Mice, besides finding the piano a
convenient place to build their nests,
appear to like the sound a lot, while
cows give more milk, and hens more
eggs, when they hear it regularly.
The pungent perfume of musk is
said to be the weaker not known as "flop-
per" is well established, while play-
ing squirrels and parrots are now re-
ported to show displeasure when ragtime
or jazz is played, and a keen experi-
ment when better types of music are
provided.

Had Ready Answer

Humor Of Mack Twain Was Always
In Evidence

Among the thousands who drifted
into the camps during the early days
of the first Nevada rush was
Samuel Clemens (Mark Twain). He
was an unlikely minor, he hung out
his shingle as a notary. Business was
poor, and to occupy his spare time
he would work at the various claims,
often turning the windfalls that lit-
tle of the ore buckets from the shafts.
Hailed one hot afternoon as he was
laboring at the crank by a passing
acquaintance with, "Well, Sam, what
do you think you are doing now?"
the perplexing young lawyer, without
pausing, gravely replied: "Just wind-
ing up the company's business."

Natural Gas Production

Production of natural gas in Can-
ada in 1927 totaled 21,534,000 cubic
feet valued at \$5,043,000. The
Province of Alberta was the principal
producer with an output of 13,
474,000 cubic feet; Ontario was
next with 7,311,216,000 cubic feet;
and New Brunswick third with 630,
755 cubic feet.

"But went to Ottawa expecting
that his Senator would get him an
easy berth."

"And did he?"

"Not exactly; but he gave him a
wide one."

"What's that?"

"Fertilizer."

"For the land's sake."

"You're right."

"Young 'Wanna say?"

"Young Thing: 'O-o-k, yes!'"

Aviator: "Wait, I'll catch one for
you."

British-Built Planes Are Declared Best

Following Successful Flight From
Powers Place Orders For Fly-
ing-Boats

Numerous orders for British-built
flying-boats have been placed by
foreign governments as a result of the
success of the great 23,000-mile flight
by a fleet of "Supermarine" flying-
boats from Britain to Australia
back to the new Empire flying-
boat base at Singapore.

A feature of the great British air
achievement was the fact that
throughout the 23,000-mile flight
neither the four flying-boats nor the
eight Napier engines which drove
them required any spare parts. The
only parts changed during the flight
were two wooden propellers which
were replaced by metal screws as be-
ing more suited to tropical conditions.
As a further result of this Empire
formation flight the Air Ministry is
to open Empire flying-boat bases
from which big metal flying-boats
will operate to assist the Navy in
patrolling Empire routes.

Manitoba Barley

Province Now Grows More Barley
Than Wheat

A barley research laboratory will
be established at the Manitoba Agri-
cultural College, and the Provincial
Government will give the necessary
financial assistance in providing every
facility for research and the study of
marketing problems, according to
Premier Broken. A committee, of
which C. H. Burnard, president of the
Manitoba Wheat Pool, is chairman,
has been organized. It will be
known as the Manitoba Barley Re-
search Committee. Hon. Albert Pre-
sident, Minister of Agriculture, will
represent the Provincial Government
and Fred H. C. Grant, of the Agricul-
tural College, will be secretary of the
committee. The purpose of the com-
mittee is to carry on research and
experimentation in growing and mar-
keting of Manitoba barley. The com-
mittee is to be a permanent one and
will have the honor of the provin-
cial government.

Airmen and Maps

53,000 Square Miles Photographed By
Royal Canadian Air Force

An extent of country larger than
the combined areas of the States of
New York, Delaware and Rhode Is-
land and also larger than the whole
of England, has been photographed
in Canada this year by the Royal
Canadian Air Force. Of the 53,000
square miles which Canada's air men
photographed, 22,000 was by vertical
and 31,000 by oblique photography.
These photographic operations ex-
tended into eight of the nine prov-
inces of Canada for such various pur-
poses as geological mapping, water-
power investigation, determination of
pulpwood and lumber resources, the
preparation of topographical maps,
experimental work.

There is an urgent demand for
mapping of areas beyond the limits of
established settlement made on the
Canadian Government Topographical
Survey, for which service the civil
operations are carried out.

Big Grain Elevator At Coast

Early In December a 1,000,000-
bushel grain elevator will be opened
on the Fraser River, near New West-
minster, British Columbia.

The elevator will have a receiving cap-
acity of 100 cars or 100,000 bushels per
day and a shipping capacity of 100
bushels per hour. It will have
railway connection with the Cana-
dian National Railway, the Great
Northern and the Canadian Pacific
Railway.

The great secret of success in life
is to be ready when your opportunity
comes.—Disraeli.

A Great Engineering Feat

The original bridge was built
in 1888, and was 120 feet high
and 75 feet high. The new bridge
rests on concrete piers which were
poured from the top of the old struc-
ture. When these were set, and pro-
vided there were no strong winds,
each of the eight 40-ton spans were
hoisted by an opportunity. Every-
thing was in readiness, and in be-
tween trains a gang of workmen rip-
ped up the old track and ties while
another group climbed up the old steel
piers and undid the bolts preparatory
to demolition. Then from one side of

the valley a huge derrick removed
the old bridge to the old pier to a sid-
ing, when the new span was brought
up from the other side and launched
into position. A temporary span
allowed a small gap between the old
new span, new ties and tracks
were laid and the bridge was ready
for traffic on the repetition of the pro-
cess on another span.

Photos show a portion of the old
bridge being torn away and inset,
a temporary span being placed between
the section of the new structure and
a section of the old bridge.

British Dirigible Stronger

Will Succeed Where Graf Zeppelin
Failed Says Commander Burney

The decision of Dr. Hugo Eckener
that the Graf Zeppelin is not a fact
enough has not discouraged Com-
mander Burney, who is completing
his plans for a dirigible of the
Zeppelin type, but is more than British
designers expected. The German air-
ship is not fast enough nor strong
enough. We now have the design of
an airship with a speed of a hundred
miles per hour. It will be more
strongly built than the Graf Zeppelin,
and it will succeed where the Ger-
man failed.

Apple Dehydrating Plant

About 20 tons of cull apples are
being treated daily at a dehydrating
plant established recently at Vernon,
British Columbia.

"Vernon is one of the most productive
fruit districts in Canada."

Canada Record For Eggs

Hen Lays 323 In Year, One Less
Than World Mark

With the close of the New Brun-
swick Provincial egg-laying con-
test, the performance of a Hatterstone
hen entered in the contest by the
owner, Mrs. Edward Hart, of Grand
Bay, N.B., stands out as most notable.
This hen has made a new Dominion
record in laying and stands within
one egg of equalling a world's record.
This hen laid 322 eggs during the
year, each egg being over standard
size. "In itself constitutes a re-
cord for the Dominion of Canada."
The world's record was made at Kan-
sas City, Mo., in 1926, by a hen owned
by a Newmarket, Ont., who had a
year's total of 323 eggs.

The previous Dominion record was
320 eggs in the 1925-26 contest at
Agassiz, B.C., held on the Dominion
Experimental Farm here.

Roque Perfect Time

A 105-year-old clock, made entire-
ly of wood, is still keeping accurate
time for D. Engelman, Pawhuska
Oklahoma. For 25 years the old
clock was in the attic, but since being
taken out, it has recorded time per-
fectly. The clock was made in Mas-
achusetts, in 1823.

Largest Exhibit Of Honey

Sashatchewan has the biggest Prov-
incial exhibit of honey at the Royal
Winter Fair in its history. Representa-
tive beekeepers from all parts of
the Province made 37 entries in hon-
ey classes.

"I believe a horse understands
man a dog."

"I don't."

"Very likely—but I was speaking
of the horse."

Few men brag about what they
learned in the school of experience.

LINES 'EM WILD

Two centuries before the Christian
era, there lived in China an Emperor
of great magnitude, known as Shih-
shing-Ti. He will be remembered
for the stupendous building erected
during his reign, known as The Great
Wall.

Two thousand years have passed
away, and this massive masonry,
with its towers and gates extending
for hundreds of miles along precipi-
tous crags and ridges—the most stu-
pendous erection of human hands—
stands as firm today as at the begin-
ning, and all men gaze upon it with
marvel.

Old as The Great Wall is, there is
something older still. It is the rocky
trail that winds through it into Mon-
golia, where, for twenty centuries be-
fore the Wall was built, men and
beasts waded their way. Camels
and their dusty drivers, caravans
and pack-ponies, donkey boys with
their whips in tedious procession for
hundreds of miles followed the high
road, that later was the winding road
of the Great Wall.

Human life was cheap in those
days and when one fell, another took
his place, and the great caravan
moved slowly on.

For centuries the city of the world
today, ruins show there were Roman
walls that guarded their cities by
stone walls, just as did the Greeks at
Athens, the Jews at Jerusalem.

Forwarded is forwarded, and in
prevention of sickness by the walls
of education in health, the Red Cross
makes its contribution in citizenship
and service to the future as well as
to the present.

The work of the Society, built
slowly yet effectively throughout the
past ten years of peace time, presents
a unique feature to students of sci-
ence along the lines of creating a
new health consciousness, a new mor-
tal exercise for the Red Cross.

Wall of Canada, protect the crippled
child, the sick settler in the wilder-
ness, the well-meaning but ignorant
mother in the home and the growing
child in the school, thus fulfilling the
obligations in Article XXV, of the
Treaty of Paris—"Improvement of
Health, Prevention of Sickness, Mitiga-
tion of Suffering."

Why a "Dumbell"

Name Taken From Apparatus Used
For Training Bed-Ringers

Why do we call the wooden exer-
cises we swing dumbbells? Why
dumb? Because centuries ago a favorite
exercise was in the pattern of
the apparatus by which the heavy
bells of a church are swung—a task
which calls for considerable energy
on the part of the ringers. This ap-
paratus was used sometimes for the
purpose of training bell-ringers, and
it is probable that its use as an exer-
ciser was first suggested in this way.
Later on, legs cucumber means
of taking corners were evolved, but the
"dumbbell" was still kept as the
name.

Look For Help From U.S.

Co-operation by the United States
in International Affairs, including
activities of the League of Nations,
along business lines with plain speak-
ing, is what the League looks for under
the presidency of Herbert Hoover.

Officials at Geneva are of the belief
that Mr. Hoover, from hard expe-
rience, realizes the inter-dependence
of nations and the need of international
collaboration.

George—I saw Mr. Fish today.

sage for me?

George—Yes, he asked me to tell
you to drop him a line.

Knowledge may be power, but it is
seldom powerful enough to move
a stubborn man.

Red Cross Makes Splendid Contribution By Caring For Sick and Needy

Two centuries before the Christian
era, there lived in China an Emperor
of great magnitude, known as Shih-
shing-Ti. He will be remembered
for the stupendous building erected
during his reign, known as The Great
Wall.

Two thousand years have passed
away, and this massive masonry,
with its towers and gates extending
for hundreds of miles along precipi-
tous crags and ridges—the most stu-
pendous erection of human hands—
stands as firm today as at the begin-
ning, and all men gaze upon it with
marvel.

Old as The Great Wall is, there is
something older still. It is the rocky
trail that winds through it into Mon-
golia, where, for twenty centuries be-
fore the Wall was built, men and
beasts waded their way. Camels
and their dusty drivers, caravans
and pack-ponies, donkey boys with
their whips in tedious procession for
hundreds of miles followed the high
road, that later was the winding road
of the Great Wall.

Human life was cheap in those
days and when one fell, another took
his place, and the great caravan
moved slowly on.

For centuries the city of the world
today, ruins show there were Roman
walls that guarded their cities by
stone walls, just as did the Greeks at
Athens, the Jews at Jerusalem.

Forwarded is forwarded, and in
prevention of sickness by the walls
of education in health, the Red Cross
makes its contribution in citizenship
and service to the future as well as
to the present.

The work of the Society, built
slowly yet effectively throughout the
past ten years of peace time, presents
a unique feature to students of sci-
ence along the lines of creating a
new health consciousness, a new mor-
tal exercise for the Red Cross.

Wall of Canada, protect the crippled
child, the sick settler in the wilder-
ness, the well-meaning but ignorant
mother in the home and the growing
child in the school, thus fulfilling the
obligations in Article XXV, of the
Treaty of Paris—"Improvement of
Health, Prevention of Sickness, Mitiga-
tion of Suffering."

Why a "Dumbell"

Name Taken From Apparatus Used
For Training Bed-Ringers

Why do we call the wooden exer-
cises we swing dumbbells? Why
dumb? Because centuries ago a favorite
exercise was in the pattern of
the apparatus by which the heavy
bells of a church are swung—a task
which calls for considerable energy
on the part of the ringers. This ap-
paratus was used sometimes for the
purpose of training bell-ringers, and
it is probable that its use as an exer-
ciser was first suggested in this way.
Later on, legs cucumber means
of taking corners were evolved, but the
"dumbbell" was still kept as the
name.

learned in the school of experience.

British Dirigible Stronger

Will Succeed Where Graf Zeppelin
Failed Says Commander Burney

The decision of Dr. Hugo Eckener
that the Graf Zeppelin is not a fact
enough has not discouraged Com-
mander Burney, who is completing
his plans for a dirigible of the
Zeppelin type, but is more than British
designers expected. The German air-
ship is not fast enough nor strong
enough. We now have the design of
an airship with a speed of a hundred
miles per hour. It will be more
strongly built than the Graf Zeppelin,
and it will succeed where the Ger-
man failed.

Apple Dehydrating Plant

About 20 tons of cull apples are
being treated daily at a dehydrating
plant established recently at Vernon,
British Columbia.

"Vernon is one of the most productive
fruit districts in Canada."

Canada Record For Eggs

Hen Lays 323 In Year, One Less
Than World Mark

With the close of the New Brun-
swick Provincial egg-laying con-
test, the performance of a Hatterstone
hen entered in the contest by the
owner, Mrs. Edward Hart, of Grand
Bay, N.B., stands out as most notable.
This hen has made a new Dominion
record in laying and stands within
one egg of equalling a world's record.
This hen laid 322 eggs during the
year, each egg being over standard
size. "In itself constitutes a re-
cord for the Dominion of Canada."
The world's record was made at Kan-
sas City, Mo., in 1926, by a hen owned
by a Newmarket, Ont., who had a
year's total of 323 eggs.

The previous Dominion record was
320 eggs in the 1925-26 contest at
Agassiz, B.C., held on the Dominion
Experimental Farm here.

The Unseen Wall Of Canada

Red Cross Makes Splendid Contribution
By Caring For Sick and Needy

Use of Combines Helped To Expedite the Harvesting of Canada's Greatest Wheat Crop

Much has been heard this autumn of the "combine," the agricultural implement which by cutting and threshing the grain in one operation has expedited the harvesting of Canada's great wheat crop, but the fact has not been brought out that the use of this machine in certain parts of the Prairie Provinces has been made possible not only by mechanical improvements but also by the development of wheats which ripen earlier than those once universally grown. The combine is not suited to all prairie districts, nor to all farming conditions even in districts where generally useful. This is recognized by all interested in prairie agriculture, but notwithstanding this the increase in the number used during the crop of 1923 as compared with those employed in 1927, has been very great. It is stated that in 1927 the number of combines in the prairie was less than 500, whereas in 1928, estimates place the total at ten times that number. Exact figures cannot be given because many of the machines were delivered only a few days before the opening of harvest.

The combine gets its name from its combination of the functions of reaping and threshing. One part of the machine cuts the grain high up, so as to take little time in reaping. The cut portion is then passed to the threshing machine section and threshed. The grain is delivered into a tank on the upper part of the machine and thence flows into the box for the engine or motor. The engine is being filled, keeps pace with the combine. As each wagon is filled it is replaced by another and the full wagon is driven to the elevator on the railway line if the distance is not too great. At the elevator the grain is placed on a graded, movable platform which is tilted in a minute or less by being tilted backward, so that the grain pours out into a hopper or elevator platform from which it is raised by an endless chain of buckets into the bins of the elevator.

One of the subsidiary reasons for the sudden increase in the use of this implement is the new "weather" or weather harvesting combine. This is a wide reaper which cuts the grain in a strip from twelve to sixteen feet across and lays it in rows or windrows to be later picked up and threshed by the combine. Since these combines are kept from touching the ground by the "shel" of stubble on which they lie, the air circulates freely all around the heads, preventing them from rotting perfectly, if somewhat green, and allowing them to dry out in case of rain. The saving in time, labour, and cash is obvious, since the grain is not bound into sheaves, then stacked on the ground, and later drawn to a central point and threshed as is otherwise necessary.

The combine is not new in principle. It was used in the southwestern part of the United States and in Australia thirty years ago, and specimens have been exhibited and their workings demonstrated in the Prairie Provinces many times previous to the last decade. Individual machines were owned in Saskatchewan as early as 1908. Generally speaking, however, farmers, even those who had as many as eight or ten binders on their farms looked at the machine in those days but refused to buy. The chief objection was that in the Prairie Provinces the wheat then sown ripened so late in the season that part of the crop had to be cut while still "on the green side" and allowed to ripen in the stack. This difficulty has been overcome by the use of the weather and by the development at Canada's experimental farms, of Marquis, Garnet, and other varieties of wheats which ripen from two to three weeks earlier than the old Red Fife variety almost exclusively sown previous to the introduction of Marquis.

The year 1922 may be considered as marking the advent into the Prairie Provinces of the improved combine under present-day conditions. In that year a 12-foot motor-driven machine was put into active service on the Dominion Experimental Station at Swift Current, Saskatchewan, thence toward the advance in its use was gradual until the great upswing of this year.

Thus by the research work of the wheat specialists of the Department of Agriculture, coupled with that of inventors and mechanics, not only has the northern limit of the wheat belt been pushed forward many score miles, but the introduction of labour-saving machinery, enabling the cutting and threshing of wheat to go on simultaneously, has also been rendered possible, and this in turn has speeded up the transportation of the crop to the markets of the world.

Indian Trappers Use Plane
Find It Economic Method To Reach Trap Lines
Nothing so indicates the widespread fringe of Canadian civilization as the fact that Indian trappers are using the plane to reach their trap lines. Natives made wealthy from profitable returns from their fur trade have long graduated from dog sleds to motor cars, but now the mail plane from Mayo occasionally carries Indian trappers, who find it an economical method of travel, a few hours of comfort in the air being substituted for days spent toiling behind a labouring dog team.

PRINCE OLAF

More Than A Year Ago
Efforts of the Canadian Co-operative Food Growers, the packers and other organizations to make lamb a more popular meat in Canada seem to be bearing fruit as the latest statistics from Ottawa show a steady increase in the consumption per capita. Three years ago Canadians were eating barely five pounds of lamb and mutton every year with almost six pounds in 1926, and 6 1/2 pounds in 1927, the latest year for which figures are available. When the 1928 statistics are announced undoubtedly a further gain will be reported as efforts to increase consumption are continuing and the quality of the lamb turned out, especially, is improving.

Lamb Becoming Popular Meat

Statistics Show Canadians Eating More Than A Year Ago
Efforts of the Canadian Co-operative Food Growers, the packers and other organizations to make lamb a more popular meat in Canada seem to be bearing fruit as the latest statistics from Ottawa show a steady increase in the consumption per capita. Three years ago Canadians were eating barely five pounds of lamb and mutton every year with almost six pounds in 1926, and 6 1/2 pounds in 1927, the latest year for which figures are available. When the 1928 statistics are announced undoubtedly a further gain will be reported as efforts to increase consumption are continuing and the quality of the lamb turned out, especially, is improving.

While the gain has been steady this country is still a long piece behind those places where lamb is really appreciated. In New Zealand for instance, the consumption for every man, woman and child is placed at 110 pounds, and there is no indication that the people there are beginning to look like sheep despite this record of almost a third of a pound per person in Australia, too, they prize lamb and mutton, and serve it freely with the per capita consumption per year estimated at 72 pounds. Great Britain is not content with less than 22 pounds, while only in United States among the more important countries, is consumption comparable to ours where it is placed at 6 1/2 pounds.

Bottle Merchant: "Any beer bottles, mum?"

Lady of the House: "Do I look as if I drunk beer?"

Bottle Merchant: "Any vinegar bottles, mum?"

"How are you getting along at your job, Bill?"

"Fine. I've got five men under me now."

"Really?"

"Yes; I work upstairs."

It is the man and woman that count, not the amount of money they have in the bank.

Ask For Tariff Adjustments

Tariff Advisory Board Deals With Several Requests

The tariff advisory board at a recent meeting in Ottawa, directed its attention upon separate references for tariff adjustments on peanuts and other varieties of nuts, clay-working machinery and unrefined domestic coconut.

Representing the confectionery, biscuit and chocolate industries of Canada, C. J. Bodley submitted a brief asking for a 99 per cent. tariff drawback on nuts used for home consumption, sheltered in Canadian factories.

R. J. Deuchman, Ottawa, represented the International Clay Products, Limited, Etobicoke, Sask., asking for the removal of the existing duty on pottery machinery, which ranges from 25 1/2 to 30 per cent. There was no opposition.

It was argued that this type of machinery was not manufactured in the above map, may be sold by the Newfoundland government to a United States syndicate. There is a strong possibility, however, that Canada should buy Labrador, which was owned by the Dominion until ordered to Newfoundland by the privy council, rather than let it go under foreign sovereignty.

May Utilize Straw From Western Farms

Problem Of Waste May Be Solved By

For years experts of one kind or another have wrestled with the idea of utilizing the millions of tons of straw that annually go to waste on prairie farms, and there is more than a flickering ray of hope that the problem is about to be solved through the invention of a new machine by a French engineer.

The Saskatchewan Government, which has closely watched every plan brought forward in the past, is said to be interested in the new invention and may ship a ton or two of these new machines. The French engineer's invention is a machine that goes straight into a slab about two inches thick and binds it with steel wire. The slab can be used for partitions or in the construction of silos or other buildings. It is also said to have possibilities as a fuel.

HIS WATERLOO

(By Clara McCreery.)

He is known to the man in the street as the master of matters financial—his forces have seen no defeat;

His holdings are vast and substantial—He rules with an autocrat's sway—

His minions do all as they're bidden—And his projects get under way—

While others are quite overriden—He governs his railroads and coal—

And sends out his ships on the water—But one thing he cannot control—

His flapper upstairs of a daughter!

"Bridget, it always seems to me that the unluckiest marriages get the best cooks." "Ah, mum, go on, you old bird."

If people are very bright, it is impossible to keep them in the dark.

Work of League of Nations Has Gained Fresh Emphasis From Signing of Peace Pact

LABRADOR MAY BE SOLD

Sir William Osage, leader of the fishermen's protective union, suggests that Labrador, shown in the above map, may be sold by the Newfoundland government to a United States syndicate. There is a strong possibility, however, that Canada should buy Labrador, which was owned by the Dominion until ordered to Newfoundland by the privy council, rather than let it go under foreign sovereignty.

Was Veteran Of Great War

German Red Cross Dog Dies Of Old Age

Old age has claimed the last of one set of veterans of the World War that were very young and tired throughout the struggle. This is no paradox, for these "veterans" were dogs attached to the German Red Cross, and the longest-lived of them all is just dead at Hamburg. He had attained 29 years, and since he was demobilized the dog had been surrounded by comfort in a good German home.

Nearly everywhere in the white man's world, and in many parts of Asia and Africa, there are former soldiers who remember with gratitude what these Red Cross dogs meant to them when they were lying wounded in places where the hospital corps was unable to go. Sometimes it was an exposed shell-hole, sometimes it was under a trench. Into these places went the Red Cross dogs of Germany, carrying first aid in their packs and ministering as best they could to afflicted man. The sight of these fine humanitarians, creeping along to avoid the danger in the air, or running gayly with the full knowledge that no marksmen would aim at them, has been properly described by German veterans as the finest they ever saw in their lives.

"Before we were married you called me an angel."

"I know it."

"And now you don't call me anything."

"That shows my self-control."

"Were it not for Canada, the continent of North America, alone of the continents of the globe, would be unrepresented at the League of Nations." Canada's voice at the "League" is, therefore, very much the voice not only of this continent, but to express it in another way, of the new world.

In these words Premier W. Mackenzie King, one of the Dominion's representatives at the recent sittings of the League of Nations in Geneva, spoke of the position of the Dominion of the League. The Prime Minister, speaking before the Ottawa branch of the League, gave a distinguished and non-partisan address.

Gathered to hear Premier King were: Hon. R. B. Bennett, Conservative leader, members of the Dominion cabinet, judges of the Supreme Court of Canada, Sir William Clark, British High Commissioner to Canada, and Signatories of the church.

"With the signing of the peace pact of 1928 in Paris," Premier King proceeded, "it seems to me that the whole work of the League of Nations has gained fresh emphasis, and that the position of the League in international affairs assumes an importance even greater than that which it has heretofore had."

The influence of the treaty for the renunciation of war, which the prime minister had signed on behalf of Canada, had, Premier King stated, permeated the very spirit of the proceedings of the League.

The Prime Minister went on: "It is now as never before the League's business to see that those evils which make for war, as for example, competitive armament between nations, are combated, as strongly as possible public opinion can be made to combat them, and that in their stead are substituted the beneficent motives which allegiance to a gospel of peace and goodwill alone can afford."

The signatories of the peace pact had pledged the honor of the nations which they represented, Premier King stated, to find specific means for settling their future differences. "Whatever view," the Prime Minister continued, "may be taken of the effectiveness of the treaty signed at Paris to achieve the great purpose of prevention of war, which is its aim, there can be no question as to the solemnity of the obligation into which the nations who are signatories to the pact have entered."

Sir George E. Foster, in introducing Premier King, referred to the "most effective and most loyal manner" in which the Prime Minister had represented Canada in the great endeavor for peace.

Once More a Grain Part

After Twenty Years Toronto Again

Shipping season in its history, by becoming once more a grain part after a lapse of twenty years.

With the completion of the two new grain elevators built on the water front, Toronto once more stands ready to receive its share of the golden stream that annually flows eastward from the prairies.

"It is more than twenty years," said Harbourmaster J. M. Allen, "since Toronto last stored the harvested grain."

The two new elevators have a total capacity of 2,750,000 bushels.

Alberta Expends Large Sum On Roads

The Alberta government has spent so far this season a total of \$3,240,000 in highways construction, maintenance, etc., according to the Calgary Albertan. This amount is within the appropriation authorized by the last session of the legislature, and is in advance of expenditures over similar works during 1927, when the total was \$2,346,000.

The largest belt ever cast in England weighed 18 1/2 tons.

"Have you ever made a wrong decision?"

"Yes. I once treated a patient for stomach-ache and found out later that he could have afforded an operation for appendicitis."—Vikings, Oslo.

CANADIAN TUBERCULOSIS SPECIALISTS RETURN

Canadian tuberculosis specialists, representing every province in Canada, who returned to Canada on Nov. 5, on the White Star liner "Calgarie" after an 11 week tour of Europe during which they studied methods of fighting the disease at some of the leading institutions in the different countries. Among those in the party are: Bottom row centre, Dr. J. M. Elliott, president of the Canadian Tuberculosis Association, Toronto; second row, left to the right, Dr. D. A. Stewart, Manitoba; Banatone, Dr. E. N. Coutts, Kitchener, Ont.; Dr. J. H. Holbrooke, Hamilton, Ont.; Dr. C. D. Paritt, Gravenhurst, Ont.; Dr. F. J. John, N.B.; Dr. T. B. H. Phelps, St. Agathe, P.Q.; Dr. J. Collins, River Glade, N.B.; Third row left to right, Dr. D. A. Carmichael, Ottawa; Dr. Harold F. Watson, Toronto; Dr. W. J. Dobbin, Whitehorse, Ont.; Dr. E. A. Harding, Montreal; and Dr. R. E. Woodhouse, executive secretary of the association, Ottawa.

Back row, left to right: masters Robert and George Woodhouse, Ottawa; Dr. G. C. Brink, Toronto; Dr. A. Lamb, Victoria, B.C.; John Hunsdell, representing the White Star Line; Dr. T. M. Stimpert, Halifax, N.S.; Dr. J. S. Campbell, Halifax; Dr. H. Harris, pursor of the "Calgarie"; Dr. B. H. Hopkins, Kingston, Ont.; Dr. A. B. Alexander, Winnipeg; and Dr. W. B. Kendall, Gravenhurst, Ont.

Mulch Paper For Plants

Found Highly Efficient in Increasing Production of Farm Products. Remarkable success has attended the utilization of mulch paper, recently developed by the International Paper Company, which has greatly increased the production of varied farm products, in some cases as high as five hundred per cent. Mulch paper is laid on the ground between the plants or, alternatively, the plants are placed in the soil through the holes made in the paper. It has proven highly efficient in stifling weed growth and preventing rapid evaporation of moisture. The dark colour of mulch paper attracts solar heat and increases the temperature of the soil.

BABY'S OWN TABLETS — ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little one she always keeps a supply on hand. The first sign that something is wrong is nothing to equal them in keeping children well. The Tablets are so mild but thorough laxative which regulate the bowels and soothe the stomach, thus driving out constipation and indigestion, colic and simple fever and making teething easier. Concerning them, Mrs. Saluste Mueller, St. John's, writes: "I have used Baby's Own Tablets for my first two years and an never without them in the house. They have always given the greatest satisfaction and I can heartily recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

GEORGIA SWEET "TATERS"
6 medium sized sweet potatoes.
3 cup nectars raisins.
3 tablespoons butter.
Salt and pepper.
Cream.

Pimp and drain the raisins. Select smooth potatoes of uniform size, preferably ones that are not too elongated. Wash, using a vegetable brush, and place in a boiling pan. Bake in a hot oven 25 to 30 minutes, until soft. Remove potatoes from oven, cut in halves lengthwise, and scoop out the inside. Mash, add butter, salt and pepper to taste and a little cream to moisten. Add raisins, re-fill shells, and bake 5 minutes in a hot oven.

CREOLE CAKE

1½ cups of prepared cake flour, sifted.
3 teaspoons of baking powder.
14 teaspoon of salt.
1½ teaspoon of cinnamon.
2 eggs well beaten.
1 cup of sugar.
3 tablespoons of shortening, melted.
2 ounces of chocolate, melted.
½ cup of milk.

Gradually beat the sugar into the eggs; add the melted shortening and chocolate and alternately the milk and flour sifted, measured, and sifted again with the baking powder, salt and cinnamon. Bake in a pan 7 x 11 inches, about 45 or 50 minutes, in an oven at 350 degrees Fahrenheit.

When the cake is cool cover it with this frosting:
1½ cup of confectioner's sugar
which has been sifted.
3 tablespoons of cocoa.
½ cup of milk.

A scant half teaspoon of vanilla. Mix the sugar and cocoa together, then stir in the two liquids, mixing it all thoroughly.

It has been found that the smoke of a cigarette will aid in keeping wasps at bay.

Troubled With Painful Eruptions Cicura Healed

"I was troubled with boils, sore eruptions on my head for over a year. They were very embarrassing. In company as I waited to be searched all the time, and if I did escape a watery fluid came from them. They were very painful, and my hair came out in patches. I tried many remedies during this time, but without success. I read an advertisement for Cicura and bought a box. The irritation stopped after one week's treatment, and after using three boxes of Cicura Soap and three boxes of Cicura Ointment, my skin was completely healed." (Signed) Miss B. Kendall, 309 Kensington St., St. James, Mass., Sept. 7, 1927.

Cicura Soap, Ointment and Talcum are all you need for all skin troubles. Soap to cleanse, Ointment to soothe and Talcum to powder.

Send for Sample Box free. Address: Cicura Corporation, 1000 Broadway, New York, N.Y. Write for Sample Box free. Address: Cicura Corporation, 1000 Broadway, New York, N.Y. Write for Sample Box free.

SUNDAY SCHOOL LESSON NOVEMBER 25

THE PRAYERS OF PAUL

GOLDEN TEXT: "Rejoice always; pray without ceasing; in everything give thanks."—1 Thessalonians 5:16-18.
Lesson: Acts 20:36-38; Romans 1:8-10; Ephesians 1:15-23; 3:14-21; Thessalonians 1:2-5.
Devotional Reading: Psalm 34:1-8.

Explanations and Comments.
Paul Prays With the Ephesian Elders, Acts 20:36-38.—Here we return to the scene on the shores of Miletus, our lesson three weeks ago. When Paul ended his talk with the elders who had come from Ephesus to meet him, he knelt on the shore and prayed with them. No doubt Paul was accustomed to deepen and consecrate his friendships with his co-workers by praying with them.

"More things are wrought by prayer than this world dreams of. Wherefore let thy voice be a fountain for me night after night."—Rudyard Kipling.

For what are men better than sheep and goats that to the word of God are dumb, though their lips be busy?—James 1:25.

That nourish a blind life within the brain, If, knowing God, they lift not hands of prayer;—John Keats.

But themselves and those who call them friends? For to the whole round earth is every way bound by gold chains about the feet of God.—Tennyson.

Paul's Thanksgiving and Prayer, Ephesians 1:15, 16.—"The Epistle of Paul generally begins with thanksgiving, the subject of which is the work of God already accomplished in those to whom he writes, and this thanksgiving is followed by a prayer in which the apostle asks that the gracious work may go on in their souls. After this, he passes to the subject he proposes to treat. In the Epistle to the Ephesians he commences with thanksgiving and prayer; and, if I may so speak, he never gets beyond this, and all that he has to impart to his readers is included in the outpouring of gratitude and desire which runs through the whole of the first three chapters. All that follows from the beginning of Chapter IV, is only the practical application of this apprehension of the divine work."—C. A. Johnston Ross.

Hence, as I have heard of your faith in the Lord Jesus and your love for the saints, wrote Paul, I mention you in my prayers (Moffatt's translation). Paul was in prison in Rome when he wrote these words, but the prison and his chains could not keep him from caring for his flock by bringing them in prayer to God. "Paul in his prayers made mention of persons and groups of persons. Are prayers as personal and specific as they ought to be? The very heathen rebuke us on this matter. On an old scene of hellfire was in Constantinople, in 172 A.D., a letter from a sister to her brother, saying, 'I continue praying for the gods for your welfare, continually, most devoutly, every day. When I got your letter, immediately I thanked the gods for your welfare,' which of us is not rebuked by the sign of the affectionate heathen girl turning from her letter to a grateful prayer. Perhaps the whole trouble lies in our neglect of thanksgiving."—C. A. Johnston Ross.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Fox Ranching Profitable

Prince Edward Island Still Leading District in Canada.

Fox ranching claim that it is a profitable pursuit, and evidently there is something in it when the applications for registration continue to rise rapidly year after year. Applications received at Ottawa for inspection to Oct. 1 this year ran over 50,000, and more have come in since that time. Prince Edward Island is the great fox-raising province. Over 23,000 of the 56,500 applications come from the Garden of the Queen. New Brunswick is second with nearly 9,500, and Ontario third, with 5,210, is the Province which is making the greatest proportional increase.

As a vermicide an excellent preparation is Mother Graves' Worm Expeller. It has saved the lives of countless children.

Fond Mother—Oh, professor, don't you think my dear little Reggie will ever learn to draw? Emigrant Artist—No; that is, not unless you harness him to a cart.

Toral Found Guilty

Verdict Of Guilty For Both Toral and the Nun Conception.

The jury returned a verdict of guilty for both Jose de Leon Toral and the nun Conception, at the conclusion of their trial here. The jury was only out one hour and forty minutes.

Toral and Conception have been on trial for the past week on charges of murder growing out of Toral's assassination of President-elect Alvarez Obregon, on July 17. It was the defence contention that the crime was of a political nature and as such, under Mexican law, could not draw the death penalty. The prosecution asked only life imprisonment for the nun Conception, who was charged as the "intellectual author" of the crime. The judge pronounced a sentence of death for Toral and of twenty years imprisonment for the nun Conception. The defence announced that it expected to appeal to the Mexican supreme court.

The remains of a lost civilization are being searched for in Soviet territory. They don't say who lost the civilization, but we can guess.

Robots in the Air

New Device May Simplify Duties Of Airplane Pilot.

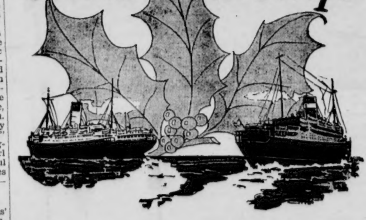

A new prototype device for steering airplanes, successfully demonstrated in Germany, indicates that one of the problems of safety flying which has occupied the attention of aeronautical engineers has been solved. In a test flight from Berlin to Breslau, in which three trans-Atlantic aviators participated, it was only necessary for the pilot to handle the controls during the take-off and landing. Once in the air, the plane was guided by an "iron man" and followed the exact course, set by the inventor, to its destination. Many stabilizing devices have been developed for aircraft, but this appears to mark the most advanced step toward lightening the duties of the pilot and giving him more time for navigational details and other tasks.

France is below Japan, Iceland and Hawaii as a use of telephones, according to recent statistics.

Vaseline or olive oil rubbed into patent leather shoes when not in use prevents cracking.

SAIL HOME on one of these famous Christmas Ships

"At home they're making merry with the white and scarlet berry," wrote Kipling, longingly, from a distant land. Soon there will be Yuletide merriment in your Old Country home. Here is time to hear the wailing, wailing Christmas, enjoy the holiday—And New Year's, too.

This wonderful holiday is well within your reach. A round-trip ocean ticket with comfortable third class accommodation costs only \$155. Book your passage now on one of our famous Christmas

Ships and enjoy a crossing gay with the spirit of the season. Cunard and Anchor-Donalson service has been famous on the Atlantic since 1840 and our Christmas ships have been popular with Old Country people for many, many years.

Low winter rates now! Return Ticket Class \$155; Return Tourist Third Cabin \$114.50. One way Cabin fares from \$146.

SPECIAL CHRISTMAS SAILINGS

From Halifax: ALBANY, Dec. 4 to St. Pierre, Havre, London and Antwerp.
From Halifax: LUTHER, Dec. 11 to St. Pierre, Havre, London and Antwerp.

CHAPTER VII.—Continued.

For a short interval the noble animal held his majestic pose, then, swaying awkwardly, he disappeared from view. At the sharp crack of the rifle the man by Donald's side winced as though the bullet had scored his own flesh. Brushing the sleeve of his coarse mackinaw shirt hastily across his eyes, he muttered a curse, then turned and ran with stumbling steps to his waiting team, mounted and armed. He brushed the sleeve of his coat and checked gently to his four horses. The big animals strained against their collars. The huge load moved slowly at first, then gathering momentum, rolled swiftly up the road.

Gillis brought five cayuses to the rear of the station and in a few minutes his practised hands loaded two of them with their luggage.

The small cavalcade moved up the dusty road in a single file, with Douglas in the lead. They overtook and met numbers of freight wagons going in and out, the drivers shouting greetings to each other in foreign tongues. They passed the track-laying machine, which was throwing the heavy rails about as if they were matches in giant hands. Garris stopped them without the zone of flying debris while giant blasts rent the air as if some titanic monster had torn the earth sunder. Huge rocks soared above the trees, then crashed to the

A rider jogging down the trail reined in his horse and, shouted a cheery greeting in true Western style. He was a clean-shaven, alert young man, with a frank smile, and seemed elastic with the swiftness of health outdoors. He swung easily from the saddle and introduced himself.

"My name is Wilkinson. I am the District Ranger. I'm getting a bit dry in spots, so I want you to be careful about your fires?"

When Douglas told him the object of their trip to Summit Lake the Ranger smiled apologetically.

"My warning was unnecessary, then. I took you for a party of campers. I'm following the construction work, so will probably see you again before long."

He mounted his cayuse, waved his hand in farewell, then galloped down the trail.

The narrow path wound around the boles of enormous trees towering high above them, some of the tallest being nearly two hundred feet in height. Gillis appraised them with a critical eye. He was thinking of them as logs, calculated in terms of board feet, over Donald their bounty and nobility cast a strange spell. How long had these monarchs enjoyed the repose so soon to be broken by puny man? Probably some of them were good-sized trees when Columbus discovered America.

The solemnity of this forest was broken by the sharp "ba-a-a-a-a" of startled deer as they caught their scent, or the sudden hum of wings as big blue-grouse shot up from their path. Once the horses pricked up their ears and snorted in fear as a bear crashed his way through the deep woods.

As daylight abandoned the forest and twilight made eerie shadows on the dusky trail, they swung to an open space on the banks of the roaring Cheamukma River, and made camp for the night.

At daybreak they began the upward climb, and by noon felt the buoyancy of the air in the higher altitude. They crossed rugged streams and skirted the sides of small lakes on whose waters rested flocks of ducks in gregarious raft-like formations. The cayuses with their enormous packs showed signs of fatigue, and Gillis called frequent halts as the trail gradually grew steeper.

"We are nearly there," cried Douglas eagerly. "A few minutes later they topped a heavily-wooded hill and were looking to a narrow path on their right. There was a sign to guide the horses, and they knew that here were rest and food for them."

There was a sudden quickening along the line. Donald's horse broke into a run, with Andy's close behind, the latter holding to the rear of his saddle and making a very bad example of it. "I wish I knew 'ow to keep this 'ere blinkin' saddle from comin' up and hittin' me in the seat," said Andy humorously.

Donald reined in his eager horse as they emerged from the woods and an enchanting scene burst on his view.

"This blinkin' 'orse is . . . " "Andy stopped at his gaze followed Douglas. Both sat spell-bound, and the others joined them quietly.

The panorama spread before them was simplicity itself and impressive. Below them stretched a lake of emerald hue, rippled here and there by occasional cat's-paws, but for the most part, placid enough to reflect the shores with mirror-like clearness. To their right lay an open valley, through which ran a crystal clear mountain stream, its banks fringed with willow, alder and blooming Labrador tea. A rustic bridge of logs crossed the rushing stream to a cluster of well-built log cabins that were fenced in by a palisade of cedar posts. Inside the enclosure a patch of freshly ploughed soil stood out rich and dark against the carpet of green.

Under the azure sky, dotted with fleecy clouds, a brilliantly white sky-line of ice-covered mountains, whose peaks flashed in the setting sun, circled this beautiful mountain valley. From below were wafted the odours of an awakening earth. The sweet perfume of the newly-opened and sticky buds of the hain-o-gilled, the delicious aroma of the spruce and pine, the heavy, sweet smell of the water plants and the white orchids; all this fragrance was borne on the crisp, sparkling mountain air. Involuntarily the travellers filled their lungs with this life-giving atmosphere.

A beautiful gold-eye drake and his drab-coloured mate swam along the shore in search of a safe place to nest. From the centre of the lake a loon sent out its wail cry, echoing and re-echoing from the wooded hills like wild, demagogical laughter. A quick rustle of wings overhead, then a mallard duck struck the water with a loud splash and immediately

TARTAR

You are faithful in your mouth toilet, brushing your teeth at least twice a day, but you still find deposits forming back of your lower teeth, to which the tongue continually goes because of their roughness, and which you cannot remove by brushing, try as you will.

How, what is this? "Tartar," so called, is salivary calculus, it enters the mouth through the saliva. The fresh deposit is soft and can be washed or brushed away when first it settles. This cleaning must be done, however, within from five to twelve hours of its appearance, since after remaining longer it begins to "set."

The calculus increases in bulk through more or less repeated accumulations until often large and thick masses of it are formed; these, pressing upon the soft gum tissues, cause them to become inflamed, which inflammation progressing, may lead to the ultimate loss of the teeth.

Now, three "words" more occur, it is found constantly on the "inside" of the lower incisors and cuspids and on the "outside" of the upper first and second molars, teeth, the reason for this being that these localities are opposite the mouth of the salivary ducts.

Lately—can be removed, to remove it by the use of special instruments, but if you are subject to tartar, a faithful brushing following each meal, especially these areas, will do much towards keeping the deposit down to the minimum.

Remote Control

"Have you ever driven a car?" the lady applicant for a license was asked. "One hundred and twenty thousand miles," put in her husband, who was standing near by, "and never had her hand on the wheel."

"Are you an American citizen, Pat?"

"Faith O' me that. O! was born in Tipperary, but on the Fourth av July."

Little Helps For This Week

"Therefore will not we fear," — Psalm xlii. 2.

I see the germ to the sunlight reach, And the nestlings know the old bird's speech.

I see the hare from the danger hide, And the stars through the pathless spaces ride; I do not see that they have a guide.

He is eyes for all who is eyes for the mole, All motion goes to the rightful goal; O God! I can trust for the human soul.—Charles G. Ames.

The providence of God, that cares for the universe as a whole, that takes it at the beginning and holds it to the consummation, that we cannot see or know, that we can only dimly grasp.—This same mighty, all-grasping order of God's providence considers my affairs; not simply nations, not simply cities, not simply families, but you and me, the leaf on the tree, the bird that sings on the flower, the flower that springs out of the sod.—M. J. Savage.

Government Not Contributing To Development Of Harbors and Seaplane Stations

George G. Wakeman, of Ottawa, inspector of the air services of Canada, in an address at the Dominion aviation conference on the development of harbors and seaplane stations, declared that the government does not intend to make any financial contribution to such works. He forecast, however, government action on the installation and maintenance of illumination apparatus necessary, not only in airports, but along airways.

Provincial Corn Show Cancelled

Owing to the unusual weather conditions during the latter part of August and early September, and the consequent reduction in the quality of much of the corn grown, the directors of the Provincial Corn Growers' Association after making a careful survey of the situation have decided against the holding of a corn show this fall. It may be noted that similar action has been taken by those in charge of the Saskatchewan corn show for this season.

Card of Thanks

Mr. and Mrs. C. Rugeven desire to express their thanks to friends for the kind sympathy extended and the assistance given in their recent sad bereavement in the loss of their son Walter.

Death Ends Hunting Party

Walter Hartsock of Ainslie Valley district, one of a party of four, met almost instant death, last Monday when he was shot by the accidental discharge of a rifle.

At the time of going to press details of the accident were not available.

About Town and Country

Under instructions from Mr. and Mrs. S. Bowen and C. S. Hofer I will offer for sale at public auction, their horses, cattle, farm machinery etc., at Mr. Bowen's farm on the west-half of Section 32, Township 29, Range 3, 6 miles south and 3 miles east of Oyen) on Thursday, November 22—B. H. Dial, Auctioneer.

John F. Miller Sight Specialist of 401 Underwood Block Calgary will be at the Hotel in Oyen on Saturday, December 1. Don't forget the date.

The ladies of All Saints Guild will hold their annual Bazaar and sale of home cooking, farm produce, afternoon tea, novelties etc., at Snyder's Garage on Saturday, December 1. Commencing at 2:30 p.m.

Every branch of farm work, farm machinery, stock etc., has an expert writer in the Family Herald and Weekly Star, the recognized first writers in Canada.

Organization Meeting of The Oyen Curling Club

The organization meeting of the Oyen Curling Club was held in the Masonic Hall, Oyen, Alberta on Wednesday night, November 14, 1928. Sixteen members were present.

The following Officers were elected for the season 1928-1929. President, Jas. Marshall; 1st Vice President, T. O. Stephenson; 2nd Vice President, S. A. Miller; Secretary-Treasurer, J. P. Rorabeck. Executive Committee: Thos. Lees; Chas. Downford; Alf Gibson; S. E. Trewin; B. H. Dial. Ice Committee: Blue; C. S. Wright; M. G. Whitlock. Membership Committee: Chas. Stewart; S. E. Trewin; T. O. Stephenson.

The fee for the season 1928-1929 was set at \$12.00 per member.

The executive were empowered to make two sheets of ice as soon as possible and call for tenders for caretaker.

The fee for the Ladies curling club for the season were set at \$30.00.

The club decided to affiliate with the Alberta Branch of the Royal Caledonian Club.

The President and Secretary were authorized to make arrangements for the Oyen Agricultural Hall.

The date for the election of Skips was set for Wednesday night November 28, at 8 o'clock p.m.

The executive were empowered to look into lighting.

Date Set for Provincial Seed Fair

The Alberta Provincial Seed Fair will be held in Edmonton during the week of January 15th, 1929. It is announced by Field Crops Commissioner W. J. Stephen. It is expected that the attendance will include a large number of farmers interested in the production of high quality seed grain, as well as many delegates to the U.F.A. convention which is to be held in Edmonton during the same week. Arrangements are being made, as in previous years, to hold the annual meeting of the Alberta Seed Growers' Association at the same time.
